Free Services To Deploy Your Code

Save it III 💗

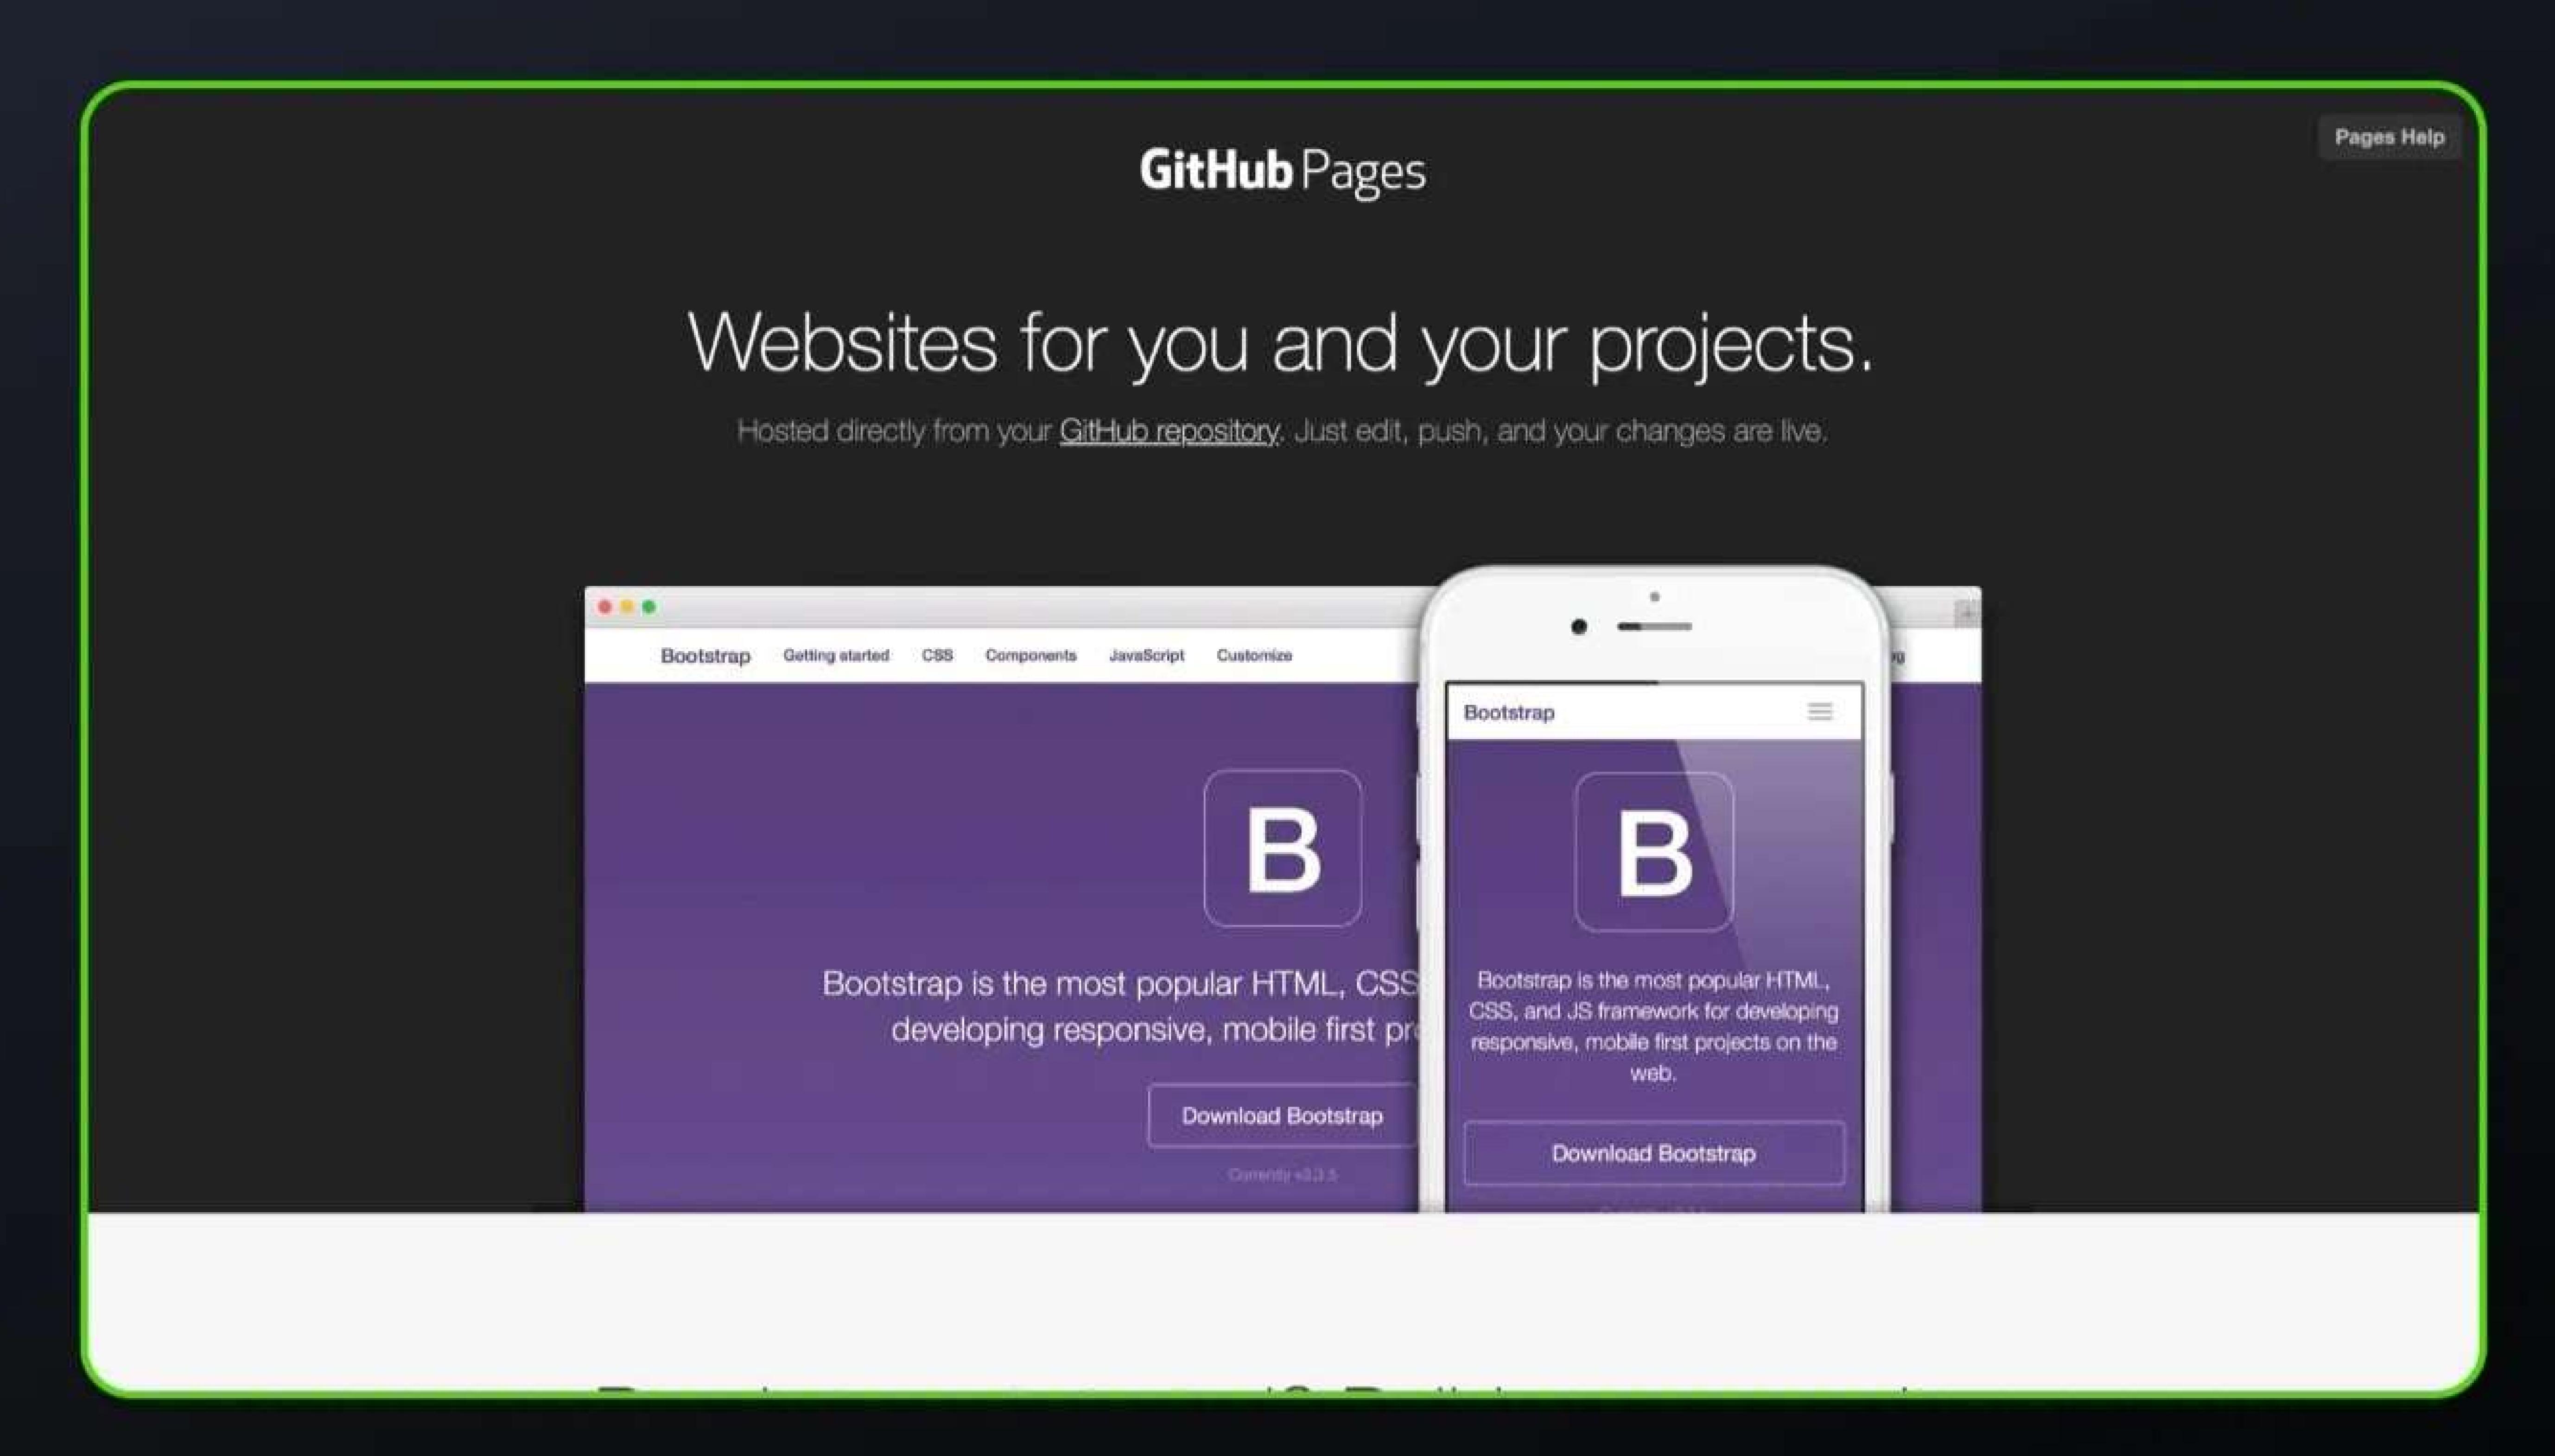

GitHub Pages

GitHub Pages is a free hosting service provided by GitHub. It's an excellent choice for deploying static websites or web apps

Wercel

Vercel is another fantastic option for hosting web applications, particularly those built with popular JavaScript frameworks like React, Vue, and Next.js.

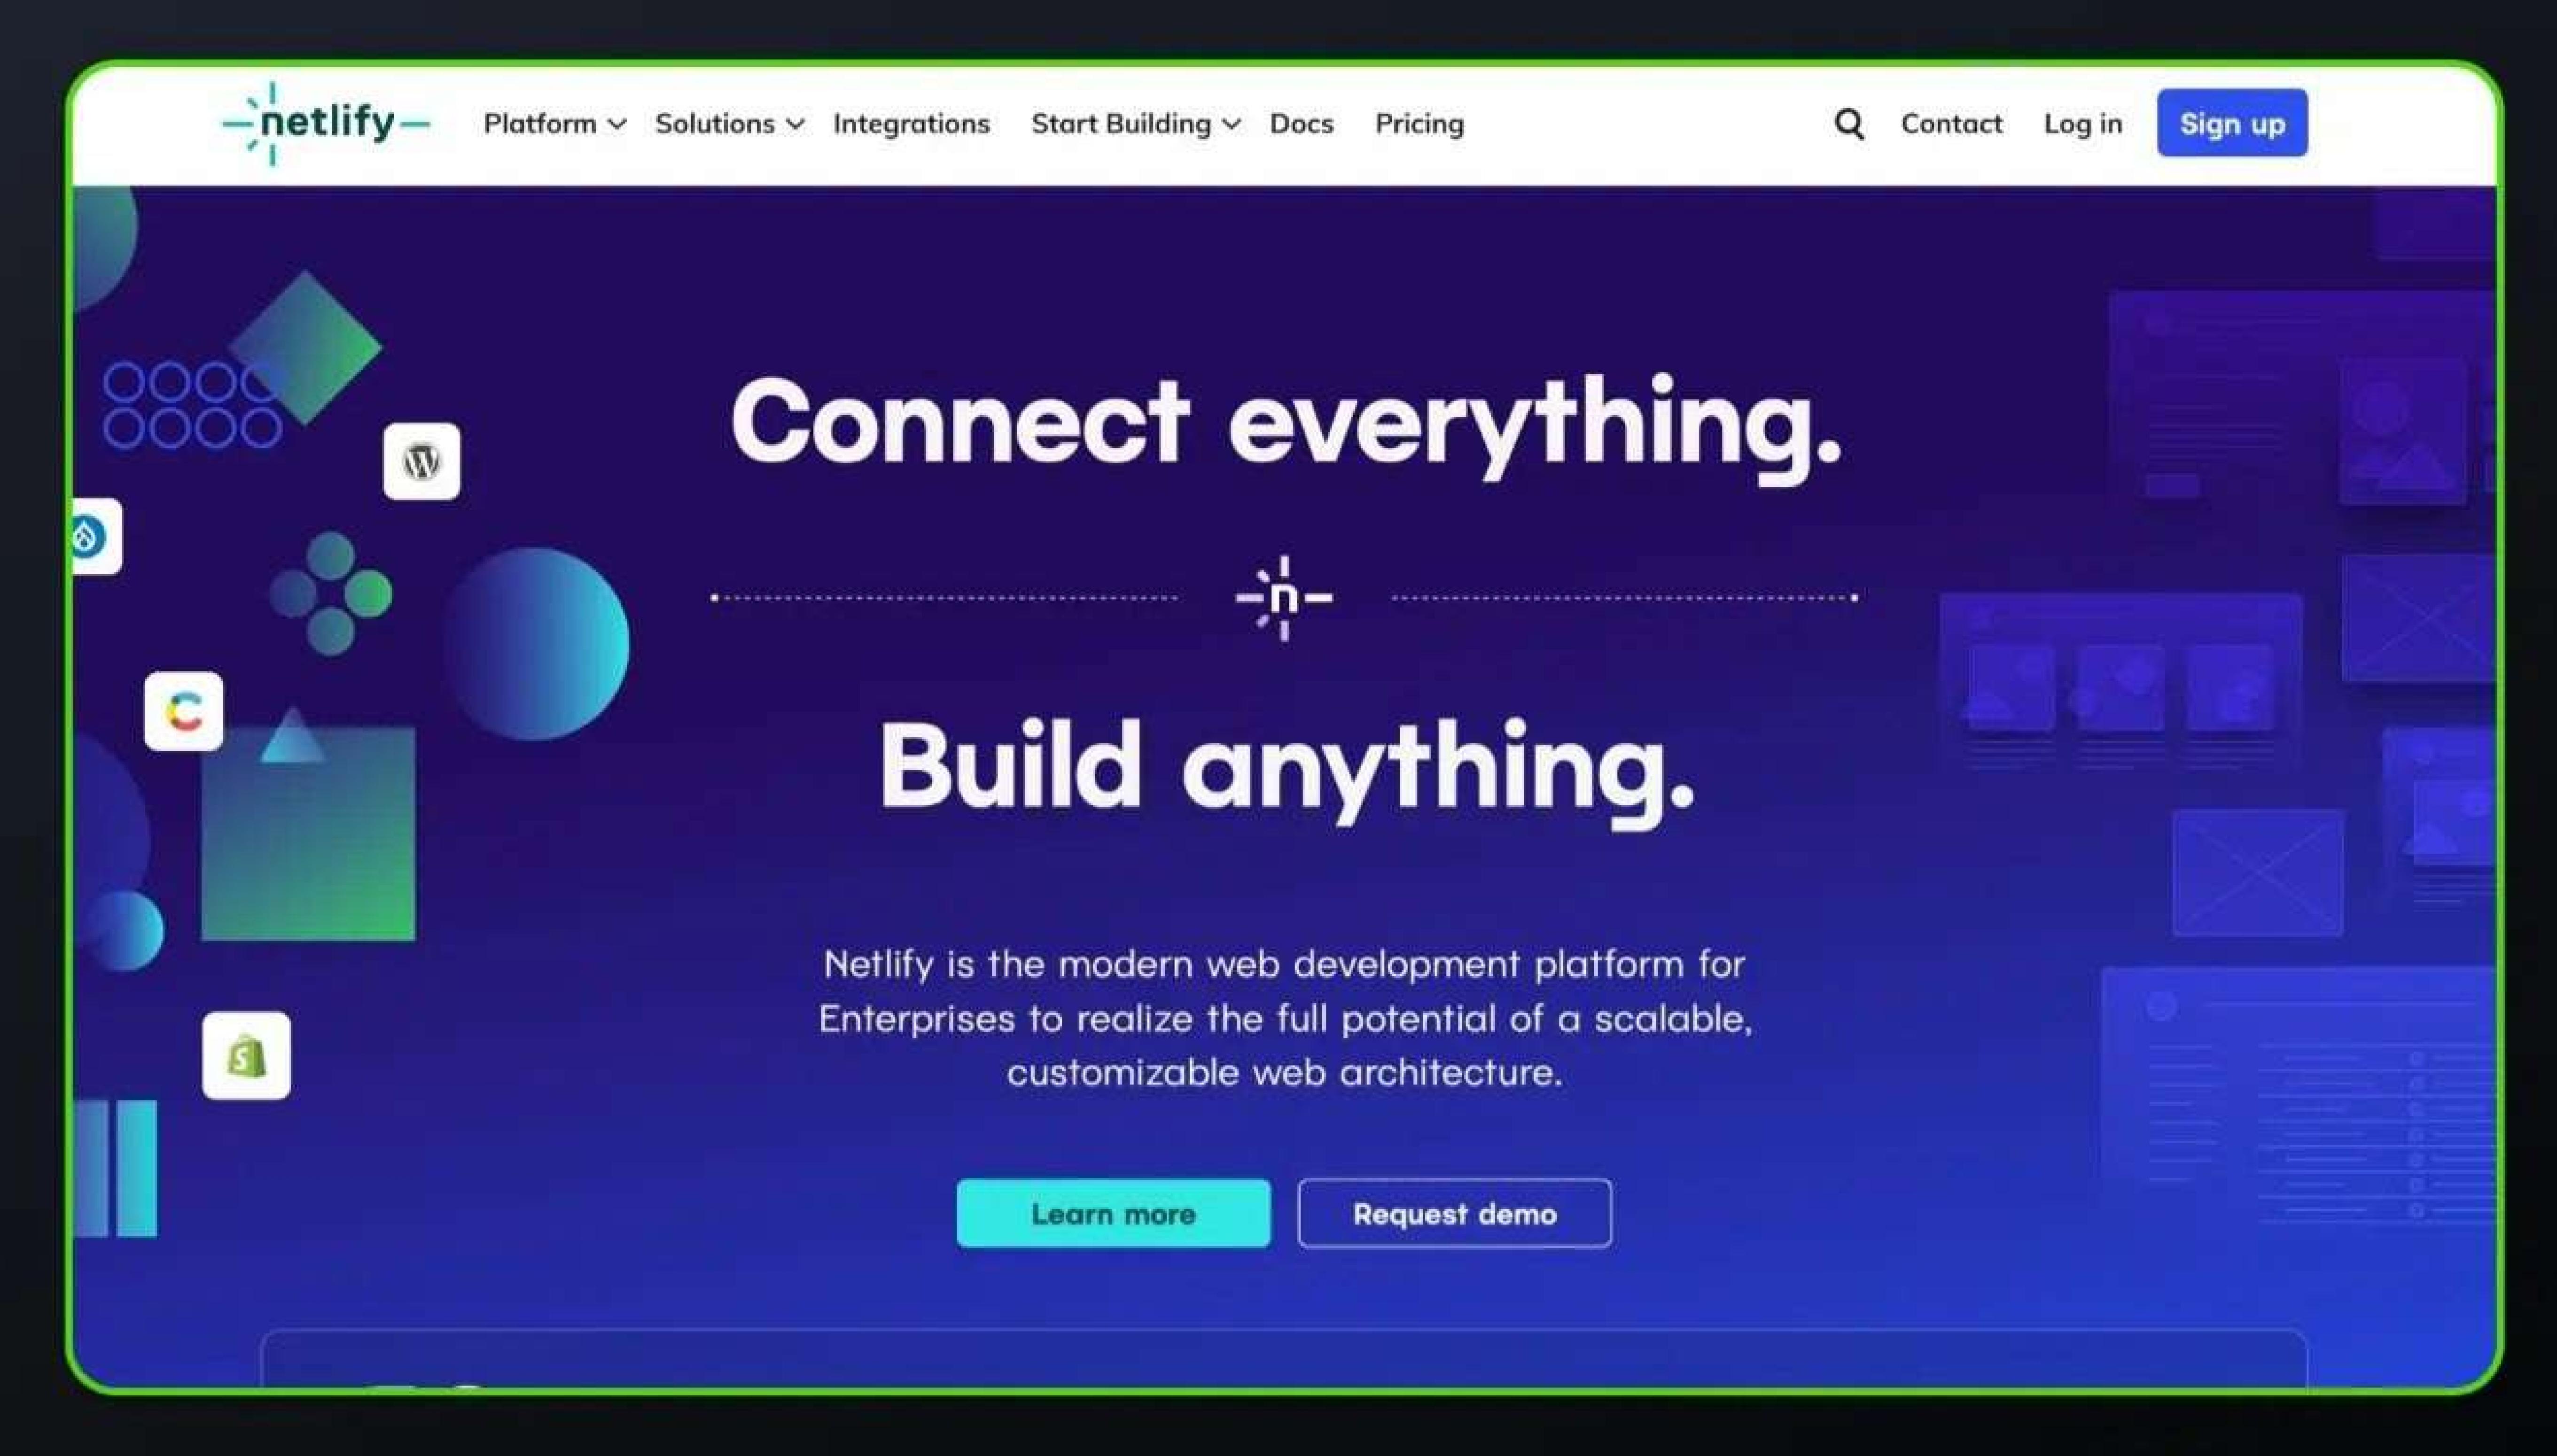

Netlify

Netlify is a popular hosting and automation platform designed for modern web projects. You can deploy static sites, serverless functions & full-stack web apps.

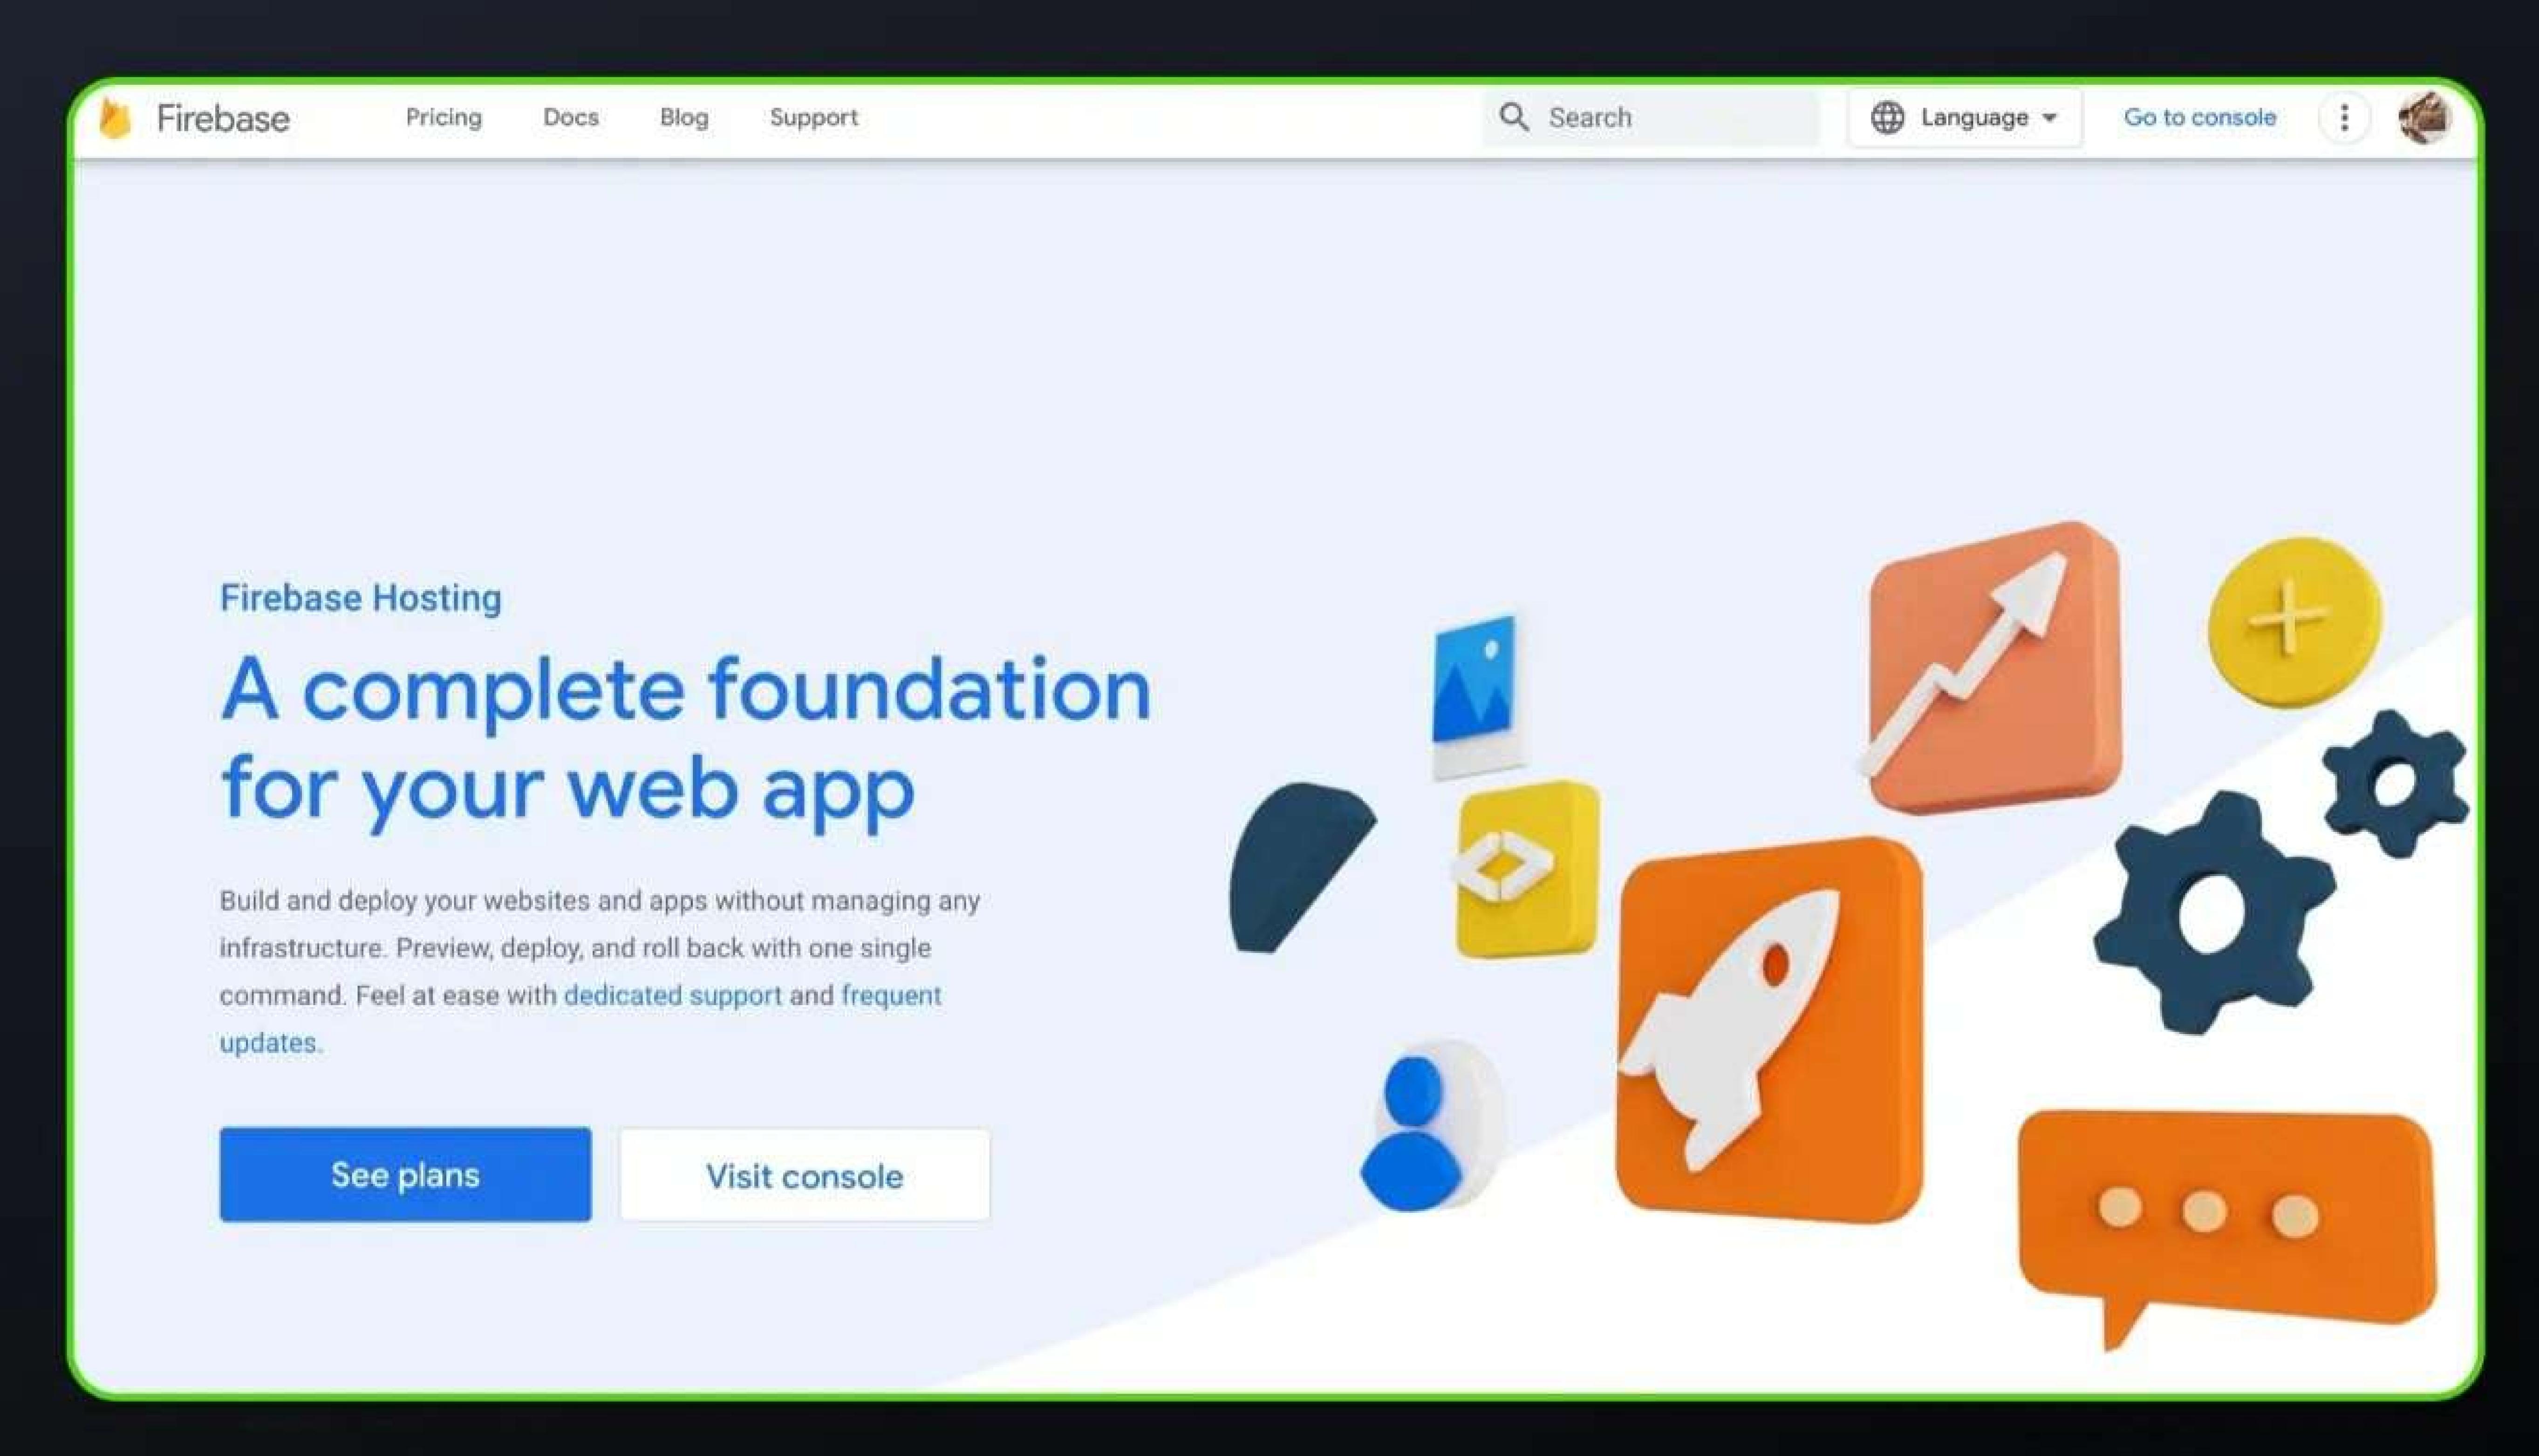

(A-.)

Firebase Hosting

Firebase Hosting is Google's hosting service tailored to mobile and web developers. It's particularly well-suited for hosting web apps, PWAs and mobile apps.

05.

AWS Free Tier

Learn to code in Python, C/C++, Java, and other popular programming languages with their easy to follow tutorials, examples, online compiler & references.

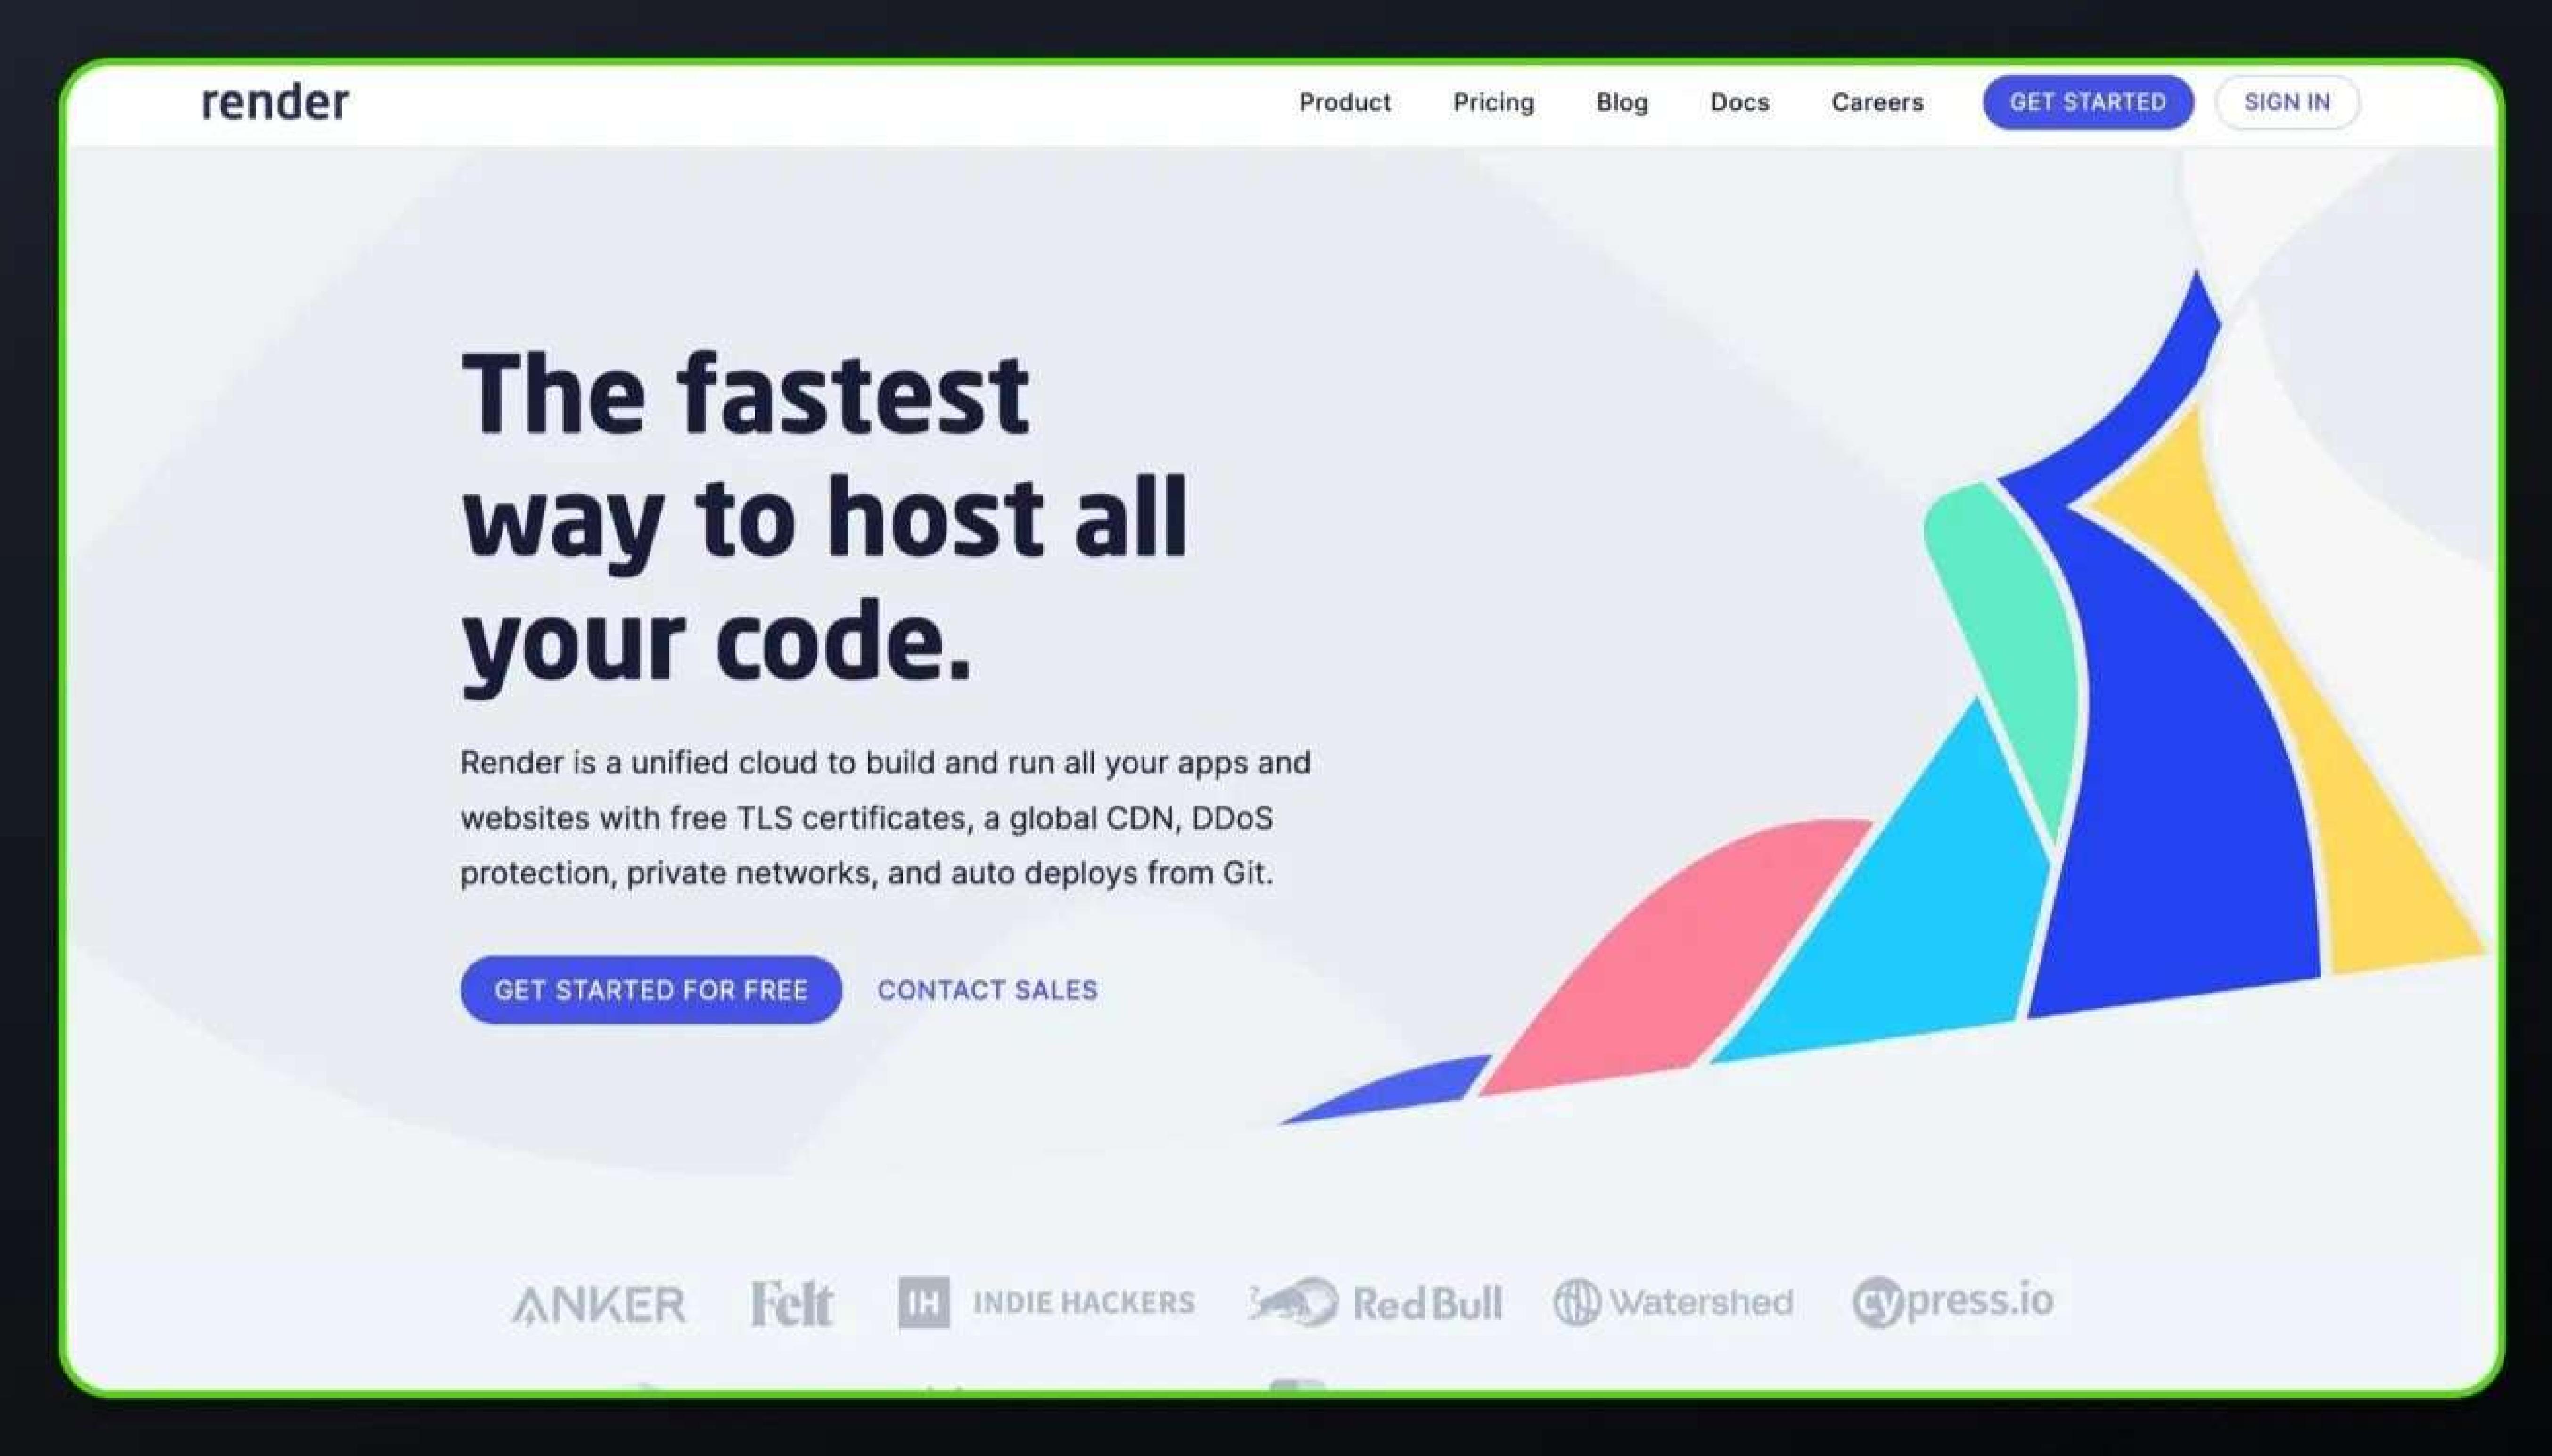

Render

Render is a unified cloud to build and run all your apps and websites with free TLS certificates, global CDN, private networks and auto deploys from Git.

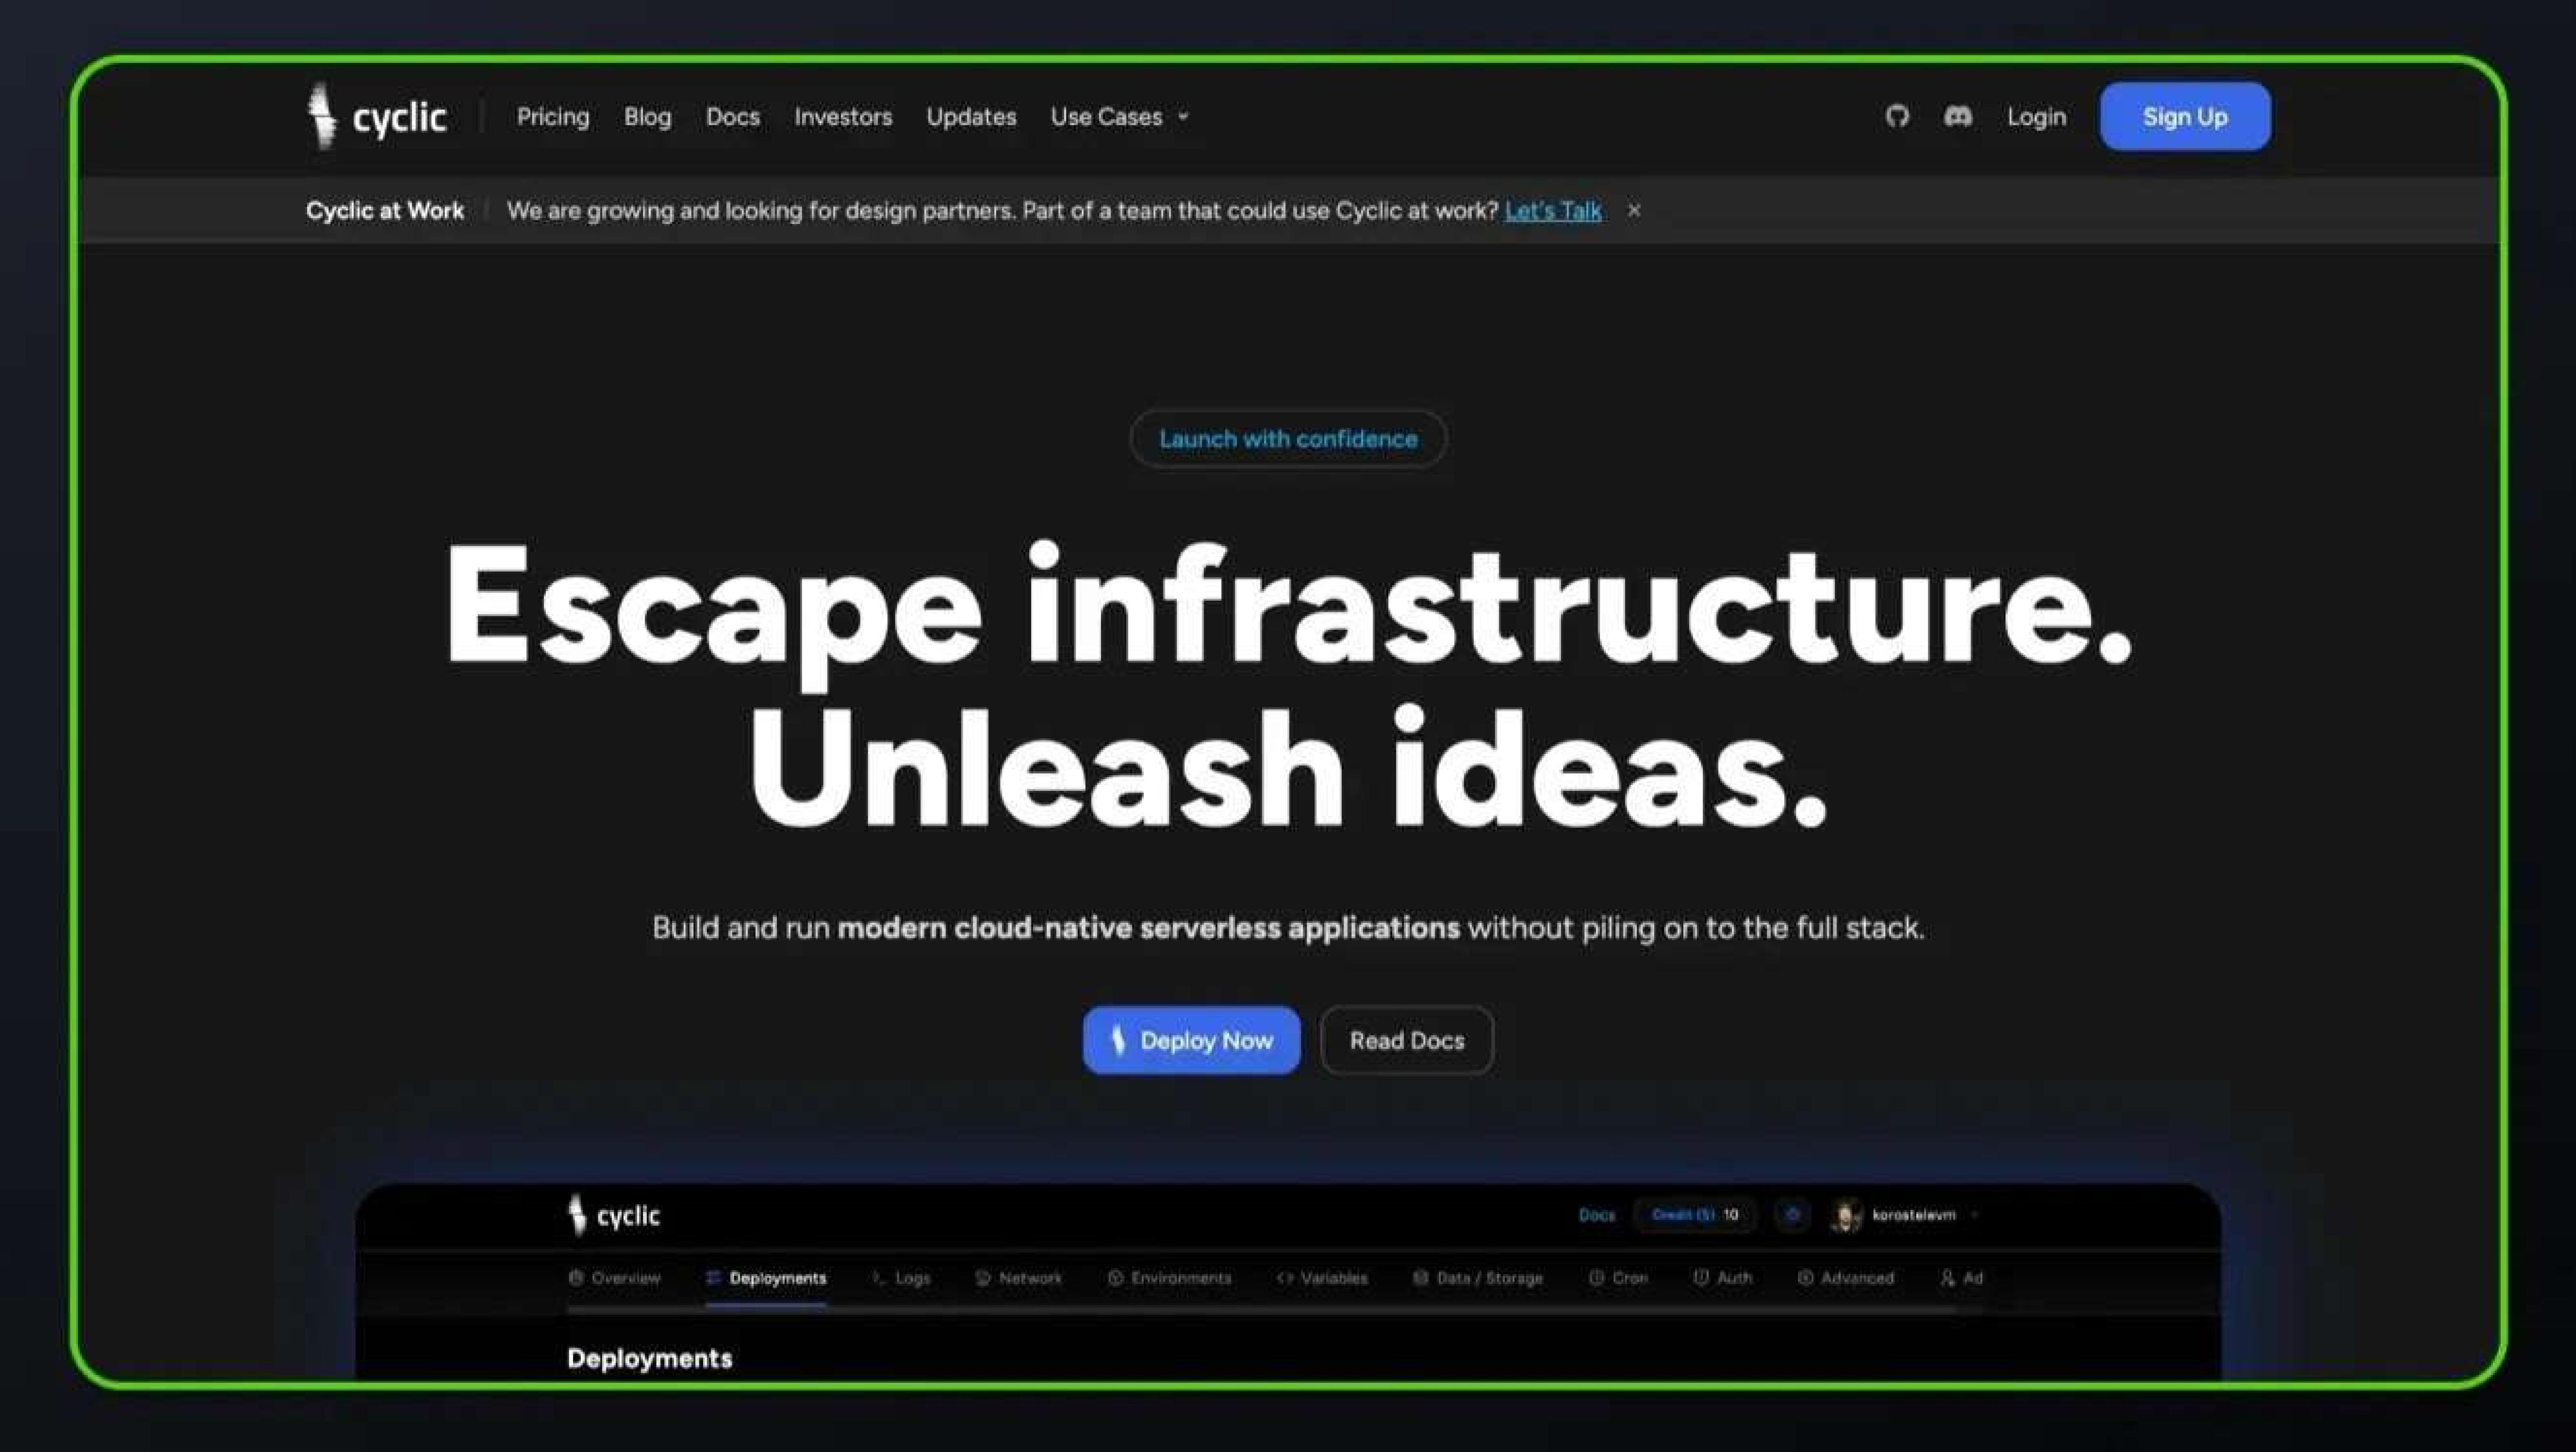

07.

Cyclic

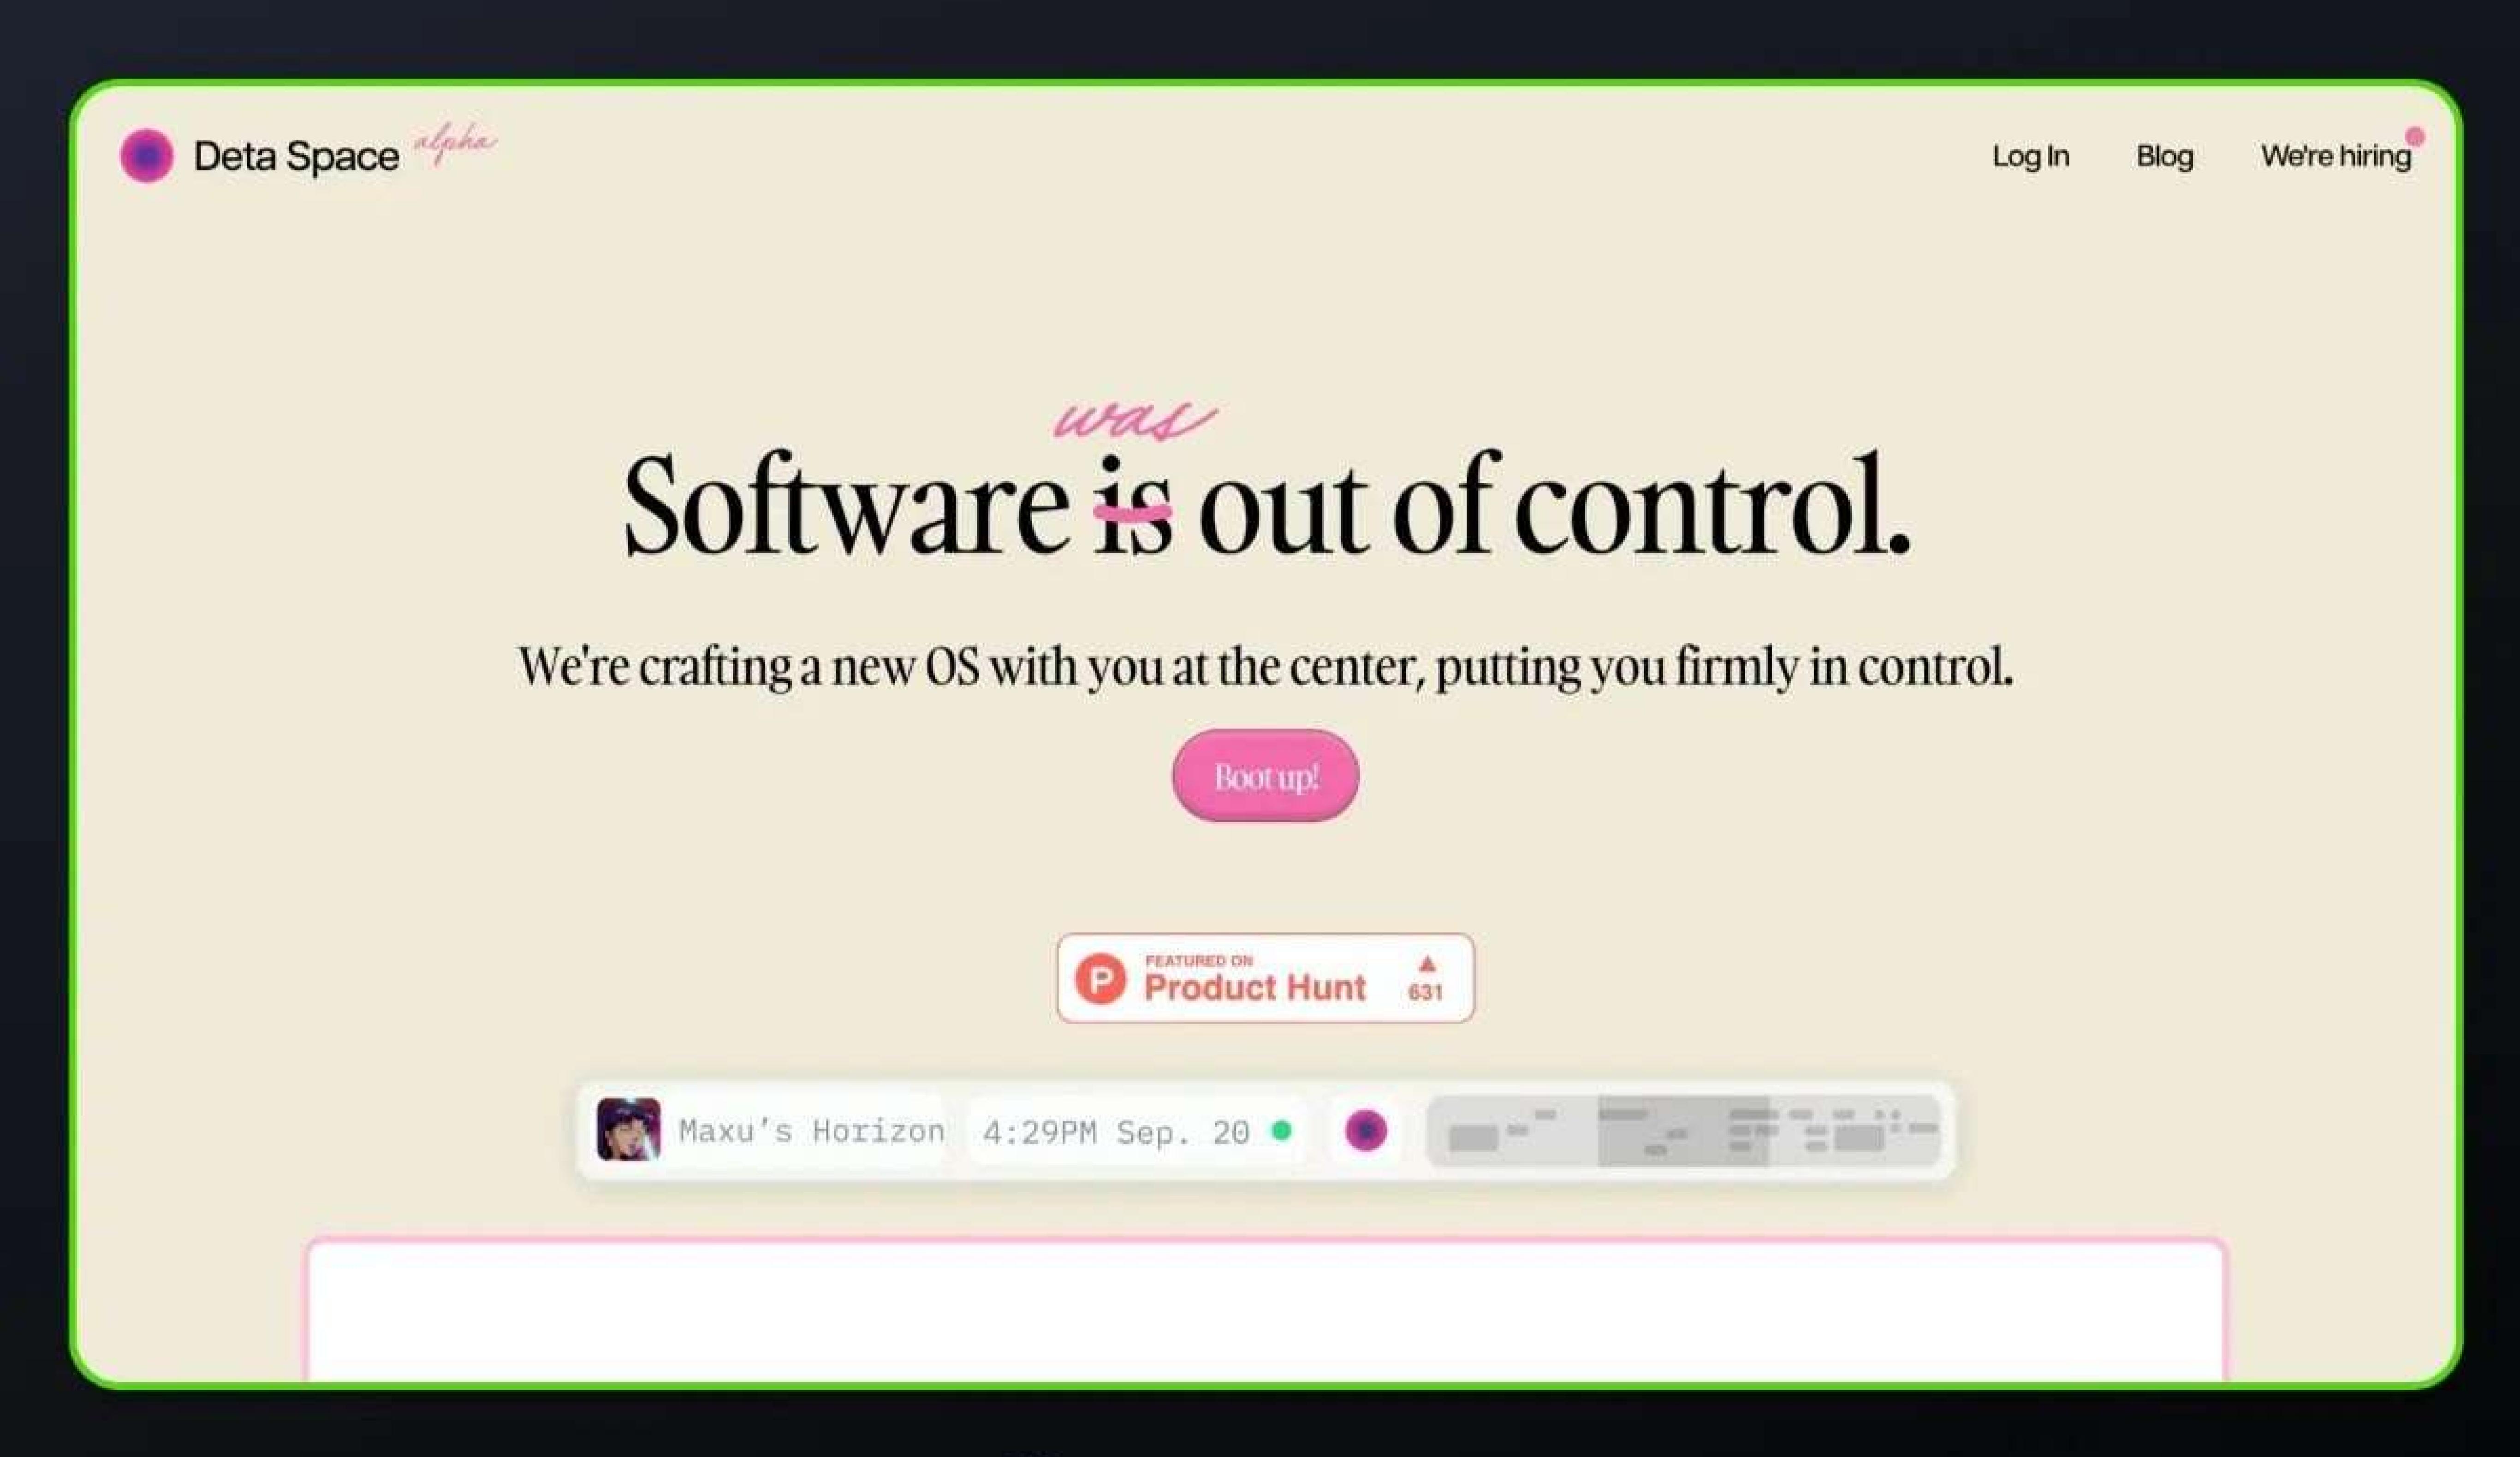

Cyclic is a cloud platform focused on full-stack applications. There are no servers and each app is deployed entirely on serverless cloud infrastructure.

Deta is a free cloud platform where you can build and deploy your ideas without worrying about server costs and without providing any credit card information.
